As to the remaining information, the undersigned hereby states that no item of this remaining information contained in the IDS was cited in a communication from a foreign Patent Office in a counterpart foreign application or, to the knowledge of the person signing the statement after making reasonable inquiry, no item of information contained in the IDS was known to any individual designated in 37 C.F.R. 1.56(c) more than three months prior to the filing of this statement.
- VIII. PAYMENT OF FEES
- ☐ A check in the amount of _____ is enclosed for the above-identified fee(s).
 - ☐ Please charge Deposit Account No.13-4773 in the amount of \$180.00 for the above-indicated fee(s).
 - ☒ If Applicant has overlooked any additional fees, or if any overpayment has been made, the Commissioner is hereby authorized to credit or debit Deposit 13-4773.
 - ☐ Two Copies of this paper are attached for Deposit Account charges and debits.

It is Applicant(s)' opinion that the claims presently on file patently distinguish the present invention from each of these references. The above references are being cited only in the interests of candor and without any admission that they constitute statutory prior art or contain matter which

anticipates the invention or which would render the same obvious, either singly or in a combination, to a person of ordinary skill in the art.

If the Examiner has any questions concerning this IDS, he/she is requested to contact the undersigned. If it is determined that this IDS has been filed under the wrong rule, the PTO is requested to consider this IDS under the proper rule (with a petition if necessary) and charge the appropriate fee to Deposit Account No. 13-4773.

Respectfully submitted,

Concise explanation of relevance of FR 2769434:

Abstract Translation:

The invention relates to a Viterbi decoding method which includes calculating a plurality of branch metric values from received data; calculating a plurality of route metric values from a plurality of previous route metric values and the branch metric values; and decoding the original data by using the route metric values. The calculation of the plurality of route metric values includes producing primary route metric values using an ACS algorithm from the branch metric values and the previous route metric values; selecting the smallest of the previous route metric values, to produce a minimum route metric value; and subtracting the minimum route metric value from the primary route metric values, to produce a plurality of current route metric values. The invention also relates to a Viterbi decoder.

Translation of page 9, line 14-27 (the relevance cited in the foreign search report):

According to the present invention, however, the distance values are not used as branch metric values, but are modified. Especially, it is the minimum value that is chosen from the distance values, so as to subtract the minimum distance value from the distance values, respectively, to produce the branch metric values. In the example cited above, it is the minimum distance value of 3 that is chosen from the distance values (6, 3, 11, 8), then it is subtracted from the distance values (6, 3, 11, 8) to produce 3, 0, 8, 5 as branch metric values BM00, BM01, BM10, BM11. Here, the sum of the branch metric values is 16, that is to say that the sum is less than 12 to (*direct translation*) the sum of the distance values.
